Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date | 13 October 2022 |
|---------------|---|
| Team ID | PNT2022TMID023 |
| Project Name | IoT Based Safety Gadget for Child Safety Monitoring & Notification |
| Maximum Marks | 4 Marks |

Functional Requirements:

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task) |
|--------|-------------------------------|---|
| FR-1 | User Registration | Registration through Form Registration through Gmail |
| FR-2 | User Confirmation | Confirmation via Email Confirmation via OTP |
| FR-3 | User Authentication | Confirming if the email id and password combination is correct |
| FR-4 | User Verification | Sending the verification mail whenever the account is logged in |
| FR-5 | Diverse Connectivity | Wi-Fi, LTE |
| FR-6 | Compliance requirements | The solution complies with related regulations |

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description |
|--------|----------------------------|--|
| NFR-1 | Usability | Users can easily navigate its interface. Users can easily determine what a feature is and what it can do |
| NFR-2 | Security | Systems require users to create accounts to access applications that store information and display profiles The application will not grant access until the user creates a strong password. |
| NFR-3 | Reliability | Highly reliable functions with the same or similar efficiency after extensive use. |
| NFR-4 | Performance | The device performs well i.e. features of a system are functioning well based on what a developer predicted. |
| NFR-5 | Availability | Platforms must offer exceptionally high availability |
| NFR-6 | Scalability | Platform is fully able to support a small, initial implementation, but also able to scale out as our business needs grow. |
